AFFORDABLE HOUSING PROJECT ALONG BOSTON INNER HARBOR WINS 2009 I. DONALD TURNER PRIZE

Berkeley, CA – February 5, 2009 – ICON Architecture's Maverick Landing in Boston Massachusetts is the winner of the 2009 I. Donald Turner Prize, which recognizes successful and innovative affordable housing projects and their leadership teams.

In 1996, visionary leader in the affordable housing field Don Turner tragically lost his life during a humanitarian mission to Bosnia. This biennale prize was created to commemorate his legacy and inspire projects that best exemplify his spirit and commitment to affordable housing.

The winning project, built by ICON Architecture, is a multi-block development on the East Boston's waterfront implementing midrise to lowrise structures to accommodate various living arrangements — from elderly apartments to market-rate townhouses. A transit-oriented development, Maverick Landing, which is Massachusetts's first green, affordable multi-family housing development, adhering to "healthy homes" principles and achieving LEED certification, is a model for projects funded through the Federal Housing and Urban Development HOPE VI program. The project restores historic street patterns and reconnects residents with the surrounding community. The site offers public open spaces including a park at one corner of the development, a crescent shape of townhouses that invites the public waterfront park into the development and broad walkways that link a community center with housing on all sides.

"We now live in the decent, quality housing we've deserved for a long time," said Ruth Capone, president of the Maverick Tenant Organization. State Representative Anthony Petrucci, an East Boston Democrat noted, "This is a model of what public housing should look like across Massachusetts."

"The Turner Prize showcases the leadership required to overcome the many obstacles to building affordable housing," said Doug Abbey, Prize Chair and Founder of IHP Capital Partners. "Quality, quantity and affordability, was Don's mantra and the prize is designed to recognize innovation in design, construction, financing, impact on residents' lives and building thriving communities."

The winner was chosen from 53 applications from over 21 states.

On February 5, 2009, the winner and finalists will be honored during the *2009 Housing Policy Forum* at the Haas School of Business, University of California, Berkeley. The Forum features panels on housing affordability, standards and mixed-income development and other housing policy issues facing the state of California. The Forum is sponsored by BRIDGE Housing Corporation, UC Berkeley's Fisher Center for Real Estate & Urban Economics, the Urban Land Institute, and the USC Lusk Center for Real Estate.

The five finalists are:

Civic-Morrison Redevelopment Housing Authority of Portland, Portland, OR

Incorporating the philosophy of "Common Ground" and the values of "Particularity of Place," the Civic-Morrison project features a mixed of housing from the crisp, sleek units well fitted to the young urban professionals to the safe, welcoming environment even for low-income residents. The project is also a model of sustainable design and construction and garners a gold LEED rating.

2009 I. Donald Turner Prize

FOR INNOVATION AND LEADERSHIP IN AFFORDABLE HOUSING

CENTER FOR COMMUNITY INNOVATION

Renaissance at Civic Center Apartments, Colorado Coalition for the Homeless, Denver, CO

The development is a mixed-use property that improves a YMCA fitness facility and creates 108 apartments for chronically homeless individuals and includes an on-site clubhouse and other amenities for residents and three supportive service teams for residents and the community.

St. Vincent's Gardens, Mercy Housing California, Santa Barbara, CA

St. Vincent's Gardens, Mercy Housing development uses mission revival architectural style, complete with arched openings and vents to create a neighborhood feel. Complete with a community building and plaza, the project include the restoration of a neglected creek and construction of new sidewalks, bike lanes and bus shelter that is useful for the broader community.

Nuevo Amanecer Apartments, South County Housing Corporation, Pajaro, CA

The development is designed to maintain the sense of community and interaction among the residents, including patios and balconies, a long central paseo with benches anchored by a large community room on one end and a tot-lot with barbecue and picnic area on the other end. The development that consists of six buildings, with some units designated farmworker households, some who receive rental assistance.

East Biloxi Homes Program, Gulf Coast Community Design Studio.

The East Biloxi Homes Program rebuilds homes damaged by Hurricane Katrina. The homes are single-family detached infill projects that include typically 2 to 3 bedrooms. The homes are elevated to meet FEMA requirements and are part of neighborhoods with proximity to churches, parks, elementary schools and grocery stores.

Jurists for this year's prize were:

- Paul Freitag, Developer, Development S Director & Senior Project Manager, Jonathan Rose Companies, LLC in New York, NY
- Richard Harris, Director, State of Oregon's Addictions and Mental Health Division in Eugene, OR
- John King, Urban Design and Architecture Reporter, San Francisco Chronicle in San Francisco, CA
- Greg Maher, Senior VP for Lending, Local Initiatives Support Corporation in New York, NY
- Anne Torney, Architect and Director of Housing, Solomon E.T.C. in San Francisco, CA
- Stockton Williams, Senior VP for External Affairs, Enterprise Community Partners, Inc. in Washington, DC.

About the I. Donald Turner Prize: The Turner Prize, a biennale award, recognizes successful and innovative affordable housing projects and their leadership teams. The \$50,000 prize was created by colleagues, friends and family of I. Don Turner. The purpose of the prize is to spread Turner's vision and principles by identifying best practices in the field. The Turner Prize is administered by the Center for Community Innovation at the University of California, Berkeley

About ICON Architecture, Inc: ICON architecture is an interdisciplinary firm, providing award-winning architectural designs and master plans throughout the US and overseas. ICON Architecture designs for the cities of tomorrow, weaving mixed uses into the urban fabric to revitalize forgotten places, capture the public spirit and create value. The firm's sustainable design solutions to complex urban projects and its commitment to the public interest are recognized by over 25 years of awards.

About the Center for Community Innovation (CCI)

The Center for Community Innovation works on issues of interest to community clients: revitalizing neighborhoods, developing economic resilience, designing and programming for the public realm, and producing and preserving affordable housing.
